

## Topography

Topography is becoming a routine test in the Eye Clinic. From keratoconus and crosslinking, to biometry clinics and everything in between. Topography provides useful data to manage the patient successfully and this course will explain how topography is measured and which tests and reports are suitable for different patient types.

By understanding topography your patient management skills will be enhanced leading to excellent patient outcomes

### Interactive Forum

Using Zoom video conferencing you can take an active part in the course, asking questions as you learn. It feels like we are all together in a classroom.

### Structure

Each module includes a live video course which is backed up with notes, plus a copy of the presentation files.

The video classes will take about 30 minutes, but we are flexible so can adapt to your needs. If you want to go over something again, we can.

### Tutor

Emma Deighan is the tutor for the Topography Course. She has worked with Bausch and Lomb (Orbscan), Zeiss (Atlas) and Oculus (Pentacam). Most recently she was UK Pentacam Trainer and ran many Pentacam Courses. The live video format is new, but is proving very popular and good for making sure all questions are answered.
