

## Vitreoretinal Surgery

This course is designed to teach vitreoretinal surgery to aspiring surgeons and established surgeons alike. It is currently based on the second edition of an extraordinarily successful textbook Vitreoretinal Surgery, a text that in many areas has become the preferred manual of this surgery. Using the book as the basis of learning the participants will receive monthly live online face-face sessions with the author to discuss the learning from the various chapters over a one-year period.

The course will provide a complete guide to all common vitreoretinal surgical procedures and covers diagnosis and other aspects of management. Completion of the course will allow a trainee or professional vitreoretinal surgeon to determine the best methodology in individual cases. We will discuss different opinions given in the “surgical pearls” which have been contributed by international experts in the field. The course is designed particularly for trainees but will also be of value to practicing professionals who need help in the management of difficult and rare cases.

### Structure

Each month will focus on chapters from the textbook Vitreoretinal Surgery. Professor Tom Williamson will host a live Q&A on the chapters and discuss the pearls he has learnt as one of the global experts in Retinal Surgery.

### Interactive Forum

Using Zoom video conferencing you can take an active part in the course. Live Q&A with Professor Tom Williamson will allow you to ask questions and learn from the questions put by other delegates.

### Tutor

Professor Williamson has over 30 years experience in the care of the eye and 25 years as a vitreoretinal specialist. He is a senior consultant Ophthalmologist at St Thomas' Hospital, London, and an Honorary Clinical Lecturer at King's College, London. He is a visiting professor at the Faculty of Engineering and Physical Sciences, University of Surrey. His specialist area of interest is retinal disease and surgery. He trained in Aberdeen, Cambridge, Glasgow and London, UK. He possesses an international reputation for surgery and research in ophthalmology. with over 200 publications. He wrote the highly successful single author textbook, Vitreoretinal Surgery (second edition, 2012, third edition in preparation) which is a premier text used by trainees and surgeons internationally.
